Step-by-Step Guide for Using Gong Intel in Your Competitive Enablement Program

Thousands of teams use Gong on a daily basis to get a reality check on what's happening with their prospects.

Those hours of demo calls and followup conversations that Gong recordings contain are another valuable source of competitive intelligence for your company.

It's the type of intel that gets lost in the minds of a few reps, or collects dust in a Slack thread.

Gather all those golden nuggets of competitive information that are begging to be shared, and integrate them into your own competitive enablement program to supercharge your Klue battlecards with Gong intel.

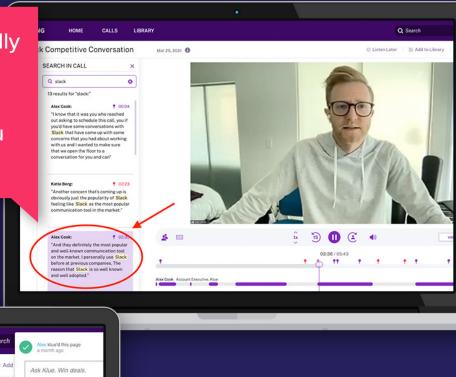

Here's your step-by-step playbook to creating battlecards with real, actionable insights.

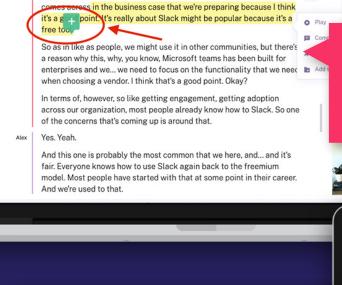

Automatically track competitor mentions and share intel into Klue

Program Gong to automatically flag whenever a competitor is mentioned. Now anytime a competitor is brought up, you can review it in Klue.

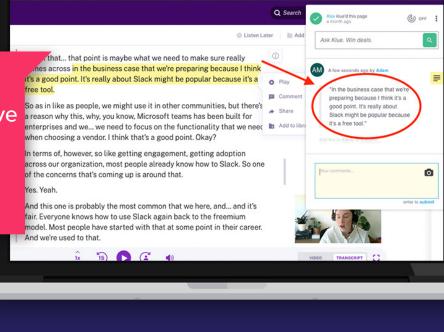

I think that... that point is maybe what we need to make sure really

it into Klue using the Chrome Extension.

You can also pull any intel directly from

the transcript of the call in Gong and send

With the Chrome Extension, both sales reps and competitive leaders can quickly send through relevant intel to be reviewed in Klue.

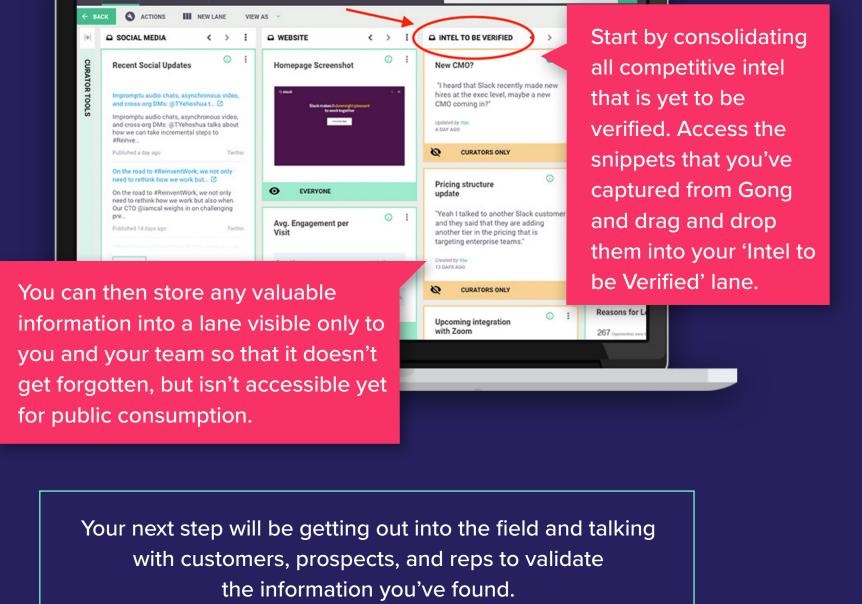

Gong calls will bring in a lot of different types of intel. You've

now got to organize this data and build actionable insights.

competitive intel that needs to be verified
